HyperLearning Technologies awarded GSA contract for IT Training Services

Specializing in Certification level training since 1995, HyperLearning Technologies announced that they can now provide Training Services to Government, both State and Federal, and to key Government Contractors under its recently awarded GSA Contract. The contract covers Instructor Led Training, Web Based Training and Education Courses, Course Development and Test Administration. The training will be conducted on site or at its modern Training Facility located on South Plaza Trail in Virginia Beach. George Geyer, President and CEO of HyperLearning Technologies, Inc. announced today the award of a GSA contract for the supply of Training Services under Special Item Number, (SIN) 874-4 Training Services: Instructor Led Training, Web Based Training and Education Courses, Course Development and Test Administration. Throughout its 16 year history, HyperLearning has helped students learn a Technology or IT topic and obtain industry-recognized certification. Programs include certifications in Microsoft Office Applications, Microsoft Operating System Technologies, CompTIA, Cisco, Ethical Hacking and Forensics and Project Management. HyperLearning recently added the Associate of Applied Science in Information Technology degree program providing a way for students to obtain an AAS degree while earning certifications in the above programs. The GSA contract will make it easier for HyperLearning's government and corporate clients to access their proven training solutions.

About HyperLearning

Mission: "The mission of HyperLearning Technologies is to deliver the highest quality technology training leading to industry recognized certification."

History: HyperLearning was founded by two brothers, Roger and George Geyer in January of 1995 and incorporated in March of that year. The Company was one of the first companies to become a Microsoft Solution Provider and has been a Solution Provider or Certified Partner since its inception to the present time. Both Roger and George are active in the company, however, George is more active as Roger, having received a PhD in Education from the University of Virginia in June 2008, has taken a position as Associate Professor with American University of Iraq.

At the time the company was founded, Roger was already a technology specialist and was one of the first Microsoft Certified Professionals. In August of 1995, Roger was a presenter in Redmond, Washington for the launching Windows 95. He gave a presentation on how the Windows 95 desktop would affect K-12 education. George was a Marine Engineer having held senior positions in Engineering, Project Management and General Management prior to co-founding HyperLearning. The Company focuses on technology training leading to industry recognized certifications. Programs include Microsoft, CompTIA, Cisco, Project Management Professional, EC Council, and Security training leading to industry-recognized certifications. HyperLearning's owners lead the way to certification preparation training by themselves becoming MCITP, MCTS, MCSA, MCSE, MCDST, MCSA, SCNP, CISSP, and CCNA certified. Both Roger and George, the co-owners of HyperLearning, are professional trainers and instructors.
